

GovCon Compliant Cloud

PRIVATE MANAGED CLOUD ENVIRONMENTS FOCUSED ON DATA SECURITY

In terms of cloud hosting, government contractors' main concern revolves around **compliance**; about the safety and integrity of their data. This is why Sand Solutions follows the **best and latest practice** policies and integrates the **highest levels of compliance**.

Data Safety and Integrity With Sand Solutions Limited

We understand that Government Contractors using Deltek software need to have their data saved in a secure, compliant cloud; **that is why we offer ITAR, HIPPA and PCI DSS in our managed clouds**. We follow strict guidelines with our security policies that extend to how we choose the location of our data centers and even who we hire: Sand Solutions only hires U.S. citizens as employees and affiliates. Our cloud specialists follow up with the latest technologies and implementations making our private managed clouds an excellent candidate for **hosting Deltek software** ... especially if you are a Government Contractor.

DATA CENTER POLICIES:

- Client data is stored in one of two compliant U.S. Data Centers inside the United States where server hardware and software are collocated and managed by our employees.
- SOC 1/SOC2 (2015), HIPPA (2015) and PCI Compliant.
- Client access to applications centered around Deltek is encrypted over Secure-Socket-Layer (SSL) certificates with TLS 1.1/1.2 protocol implementations as mandated by the NIST.
- Deltek Costpoint implementations utilize Database, Single-Sign On or Active Directory authentication.

Sand Solutions offers GovCon compliant private cloud hosting and disaster recovery, but even if you are not a Government Contractor, you can still benefit from our data security and integrity expertise ...
